

Public Notice – Environmental Permit

PURPOSE OF NOTICE: To seek public comment on the proposal to utilize an alternate groundwater point of compliance (APC) at the below described solid waste landfill with a permit issued from the Department of Environmental Quality.

PUBLIC COMMENT PERIOD: January 22, 2014 to February 21, 2014

PERMIT NUMBER: SWP 204

FACILITY NAME AND LOCATION: The applicant's sanitary landfill is located approximately 1/10th mile west of Winchester Road on the east side of the City of Waynesboro, Virginia. The landfill is located on the Waynesboro-East, Virginia, U.S. Geological Survey, 7½ minute series, topographic quadrangle map.

DESCRIPTION: The landfill has requested a variance to locate one or more of its groundwater monitoring wells somewhere other than at the edge of the landfill waste mass as is normally required by the Commonwealth's solid waste regulations. The applicant has demonstrated that moving the location of the monitoring well further from the edge of the waste mass will not result in an unreasonable risk to public health or the environment and will result in a facility design that is equally protective of human health and the environment. If approved, this variance will allow the facility to locate MW-215 approximately 350 feet downgradient from the edge of the waste mass, but the well will remain located on landfill property.

HOW TO COMMENT: DEQ accepts comments by e-mail, fax, or postal mail. All comments must include the name, address and telephone number of the person commenting and be received by DEQ within the 30-day comment period defined above. The public may review all related variance petition documents at the DEQ Regional Office named below.
